

Guide

Fast weather data access

We provide reliable, easy-to-use weather products, supporting millions of developers around the clock. Our solutions are designed to fit a wide range of applications, from simple projects to complex enterprise systems (<https://openweather.co.uk/>).

- A spectrum of ready-to-use weather products
- Short-term and long-term forecasts, history and observation
- Any location on the globe
- Transparent pricing and licensing

Our weather products are accessible through fast, reliable APIs ([/api](#)) that meet industry standards and integrate with various enterprise systems. They include essential climate data for any location, along with specialised products for weather-sensitive industries, like the Road Risk API ([/api/road-risk](#)) and Solar Panel Energy Prediction ([/api/solar-panels-and-energy-prediction](#)).

OpenWeather products

OpenWeather provides hyperlocal minute-by-minute forecasts, historical data, current conditions, and weather forecasts ranging from short-term to annual for any location worldwide. All data is accessible via industry-standard APIs ([/api](#)).

One Call API by call ([/api/one-call-3](#)):

One call 3.0 gives users access to a wide range of data for specific locations, including:

- Current weather
- Minute forecast for 1 hour
- Hourly forecast for 48 hours
- Daily forecast for 8 days
- Government weather alerts
- Weather data for any timestamp from 1st January 1979 till 4 days ahead forecast
- Daily aggregation of weather data for 46+ years archive and 1.5 years ahead forecast
- Weather overview with a human-readable weather summary for today and tomorrow's forecast

[Subscribe to One Call by Call](#) ([/price](#))

For additional functionality, please consider our generous professional product collections.

Professional collections:

1. Current Weather and Forecasts collection

- Real-time ([/current](#)), updates every 10 mins
- 4-day forecast ([/api/hourly-forecast](#)), with hourly granularity
- 16-day forecast ([/forecast16](#)), with data available four times daily (morning, day, evening, night)
- 30-day extended forecast ([/api/forecast30](#))

OpenWeather Weather model

Ulla Weather Assistant

OpenWeather provides accurate weather data by drawing on trusted sources such as

We use cookies to personalize content and to enhance our marketing efforts. We also use cookies to analyze site usage and to assist in our marketing efforts. You can control the settings of these cookies in our cookie policy. [Advanced Settings \(https://openweathermap.org/cookies\)](#)

meteorological agencies boost reliability, with updates released every 10 minutes to ensure precision. Remarkably, the OWHL™ model reports less than 1% of temperature predictions deviating by more than 5°C. Widely recognised as a leading provider of short-term forecasts, OpenWeather acknowledges that accuracy diminishes over longer periods due to atmospheric complexity. Thus, while short-term forecasts remain highly reliable, it is prudent to view predictions beyond a week with a degree of caution.

Continuously refining its models using real-time data, OpenWeather delivers reliable forecasts worldwide, covering both remote and densely populated areas. It also offers minute-by-minute precipitation data and hyperlocal insights, establishing itself as a trusted choice for businesses across the globe. You can find out more about OpenWeather model [here \(https://openweather.co.uk/technology\)](https://openweather.co.uk/technology).

How to start using Weather API

To get started with our free or paid Weather API, read [‘How to start and use the API efficiently’ \(/appid\)](#).

If you are ready to subscribe to our [paid plans \(/price\)](#), please read [‘No-fuss subscription to our weather services’ \(/full-price#commonquestions\)](#) first.

Please read [Terms and conditions of sale \(http://openweather.co.uk/storage/app/media/Terms/Openweather_terms_and_conditions_of_sale.pdf\)](#), [Privacy policy \(http://openweather.co.uk/privacy-policy\)](#), and [Websites terms and conditions of use \(http://openweather.co.uk/storage/app/media/Terms/Openweather_website_terms_and_conditions_of_use.pdf\)](#) of use before you buy.

[Licenses \(/full-price#licenses\)](#) we use for data and services.

If you are an Enterprise license holder you can request for expanded features, customisation, configuration of APIs, and more exclusive support. For more details, please [contact us \(mailto:info@openweathermap.org\)](mailto:info@openweathermap.org).

More than ever, our [customer support team \(https://home.openweathermap.org/questions\)](https://home.openweathermap.org/questions) is at your side to answer all your questions and respond to your needs in the best possible way.

If you do not find answers to your questions about purchasing process, subscriptions, products, please look at our comprehensive [FAQ \(/faq\)](#) or contact our [customer support team \(https://home.openweathermap.org/questions\)](https://home.openweathermap.org/questions).
